

Electrical Training Course

ELECTRICAL SAFETY FOR NON-ELECTRICAL STAFF

DURATION: 1 Day

WHO IS THIS TRAINING COURSE FOR?

The course is designed for all employees using portable electrical equipment in the workplace, with little or no basic electrical training. These include machine operators, maintenance technicians, fitters and designers – but also service personnel such as janitors/caretakers, cleaning staff etc. who have to work with electrical equipment or enter rooms containing such equipment. The course is also aimed at personnel using portable electrical equipment in the workplace.

COURSE CONTENT

The course is delivered over one day and covers the following:-

- What is portable electrical equipment
- What are the risks
- What can go wrong
- Detecting and reporting faulty/damaged equipment
- Testing equipment
